WISCONSIN REGULATORY DIGEST

A Publication of the
MEDICAL EXAMINING BOARD

No. 1

September, 2004

Message from the Chair, Alfred Franger, M.D.

Welcome to the year 2004 edition of the Medical Digest. In this issue we will present not only the usual list of Medical Examining Board actions, but we hope to bring you news of some exciting changes which will streamline markedly the handling of Board business.

We are privileged to have as Secretary of the Department of Regulation and Licensing an extremely capable and energetic person, Ms. Donsia Strong Hill. She has already taken steps to improve functioning of the entire Department, and will continue to do so. Paramount among these endeavors is the updating of the Department's website (www.drl.state.wi.us). See article, page 3. If you have not visited this site recently I heartily encourage you to do so. You will find much information pertinent to the Department and to our profession, and it also links to many useful sites.

Other changes include streamlining the handling of complaints so as to shorten the time between filing of the complaint and final disposition. Secretary Strong Hill is striving to establish a "paperless office" to facilitate this handling. Other important changes are in the works and we will keep you informed of their progress.

No doubt you have read articles published in several of the state newspapers authored by Sidney M. Wolfe, MD of the Public Citizens Health Research Group which is a "Ranking of the Rate of State Medical Board's Serious Disciplinary Actions in 2003." This article appears every spring and usually shows the state of Wisconsin with a very low ranking in "punishing bad doctors." Succinct and factual rebuttals have been published in the past by

Drs. Darrold Treffert and Sidney Johnson, former Chairs of the Board. Suffice it to say at this point that Dr. Wolfe's statistics are very open to question. An alternate interpretation of his report might be that we have such good physicians in Wisconsin that there is little need for disciplinary action.

The Medical Examining Board is in dire need of "expert witnesses" in all fields of medicine to assist Board members in their handling of cases brought before the Board for judgment. Those who choose to volunteer as experts will have the satisfaction of furnishing a much needed service in maintaining the health and safety of the people of Wisconsin. If you are interested, please contact Secretary Strong Hill or one of the Board members. (There is some remuneration.) We all have the responsibility of maintaining the high standards of practice necessary to and demanded of our profession.

2004 MEB Meetings

The Wisconsin Medical Examining Board will meet four more times in 2004: on September 15th, October 20th, November 18th, and December 15th. All meetings are held at 1400 E. Washington Ave., Madison, Room 179A. For copies of meeting agendas or minutes, go to the department's website at: <http://drl.wi.gov>.

Wisconsin Statute 655.27 – The Patients Compensation Fund

In 1975, the Patients Compensation Fund (PCF) was created to cover claims of malpractice against health care providers in excess of the amount of primary liability insurance required by the state to practice as a health care provider. The current primary insurance liability coverage requirement is \$1,000,000 per occurrence and \$3,000,000 per year.

Unless certain conditions are met, all licensed physicians and osteopaths are required to have their liability insurance providers submit a Certificate of Insurance to the PCF as well as pay the fee assessment from the PCF.

The amount of the fee assessment is determined based on the type of practice.

Under certain conditions, a physician or osteopath with a current license may be exempt from paying the fee assessment. Examples of these conditions include working for a state agency, practicing in another state or not actively practicing medicine for a period of time. However, the licensee is required to submit a properly-completed exemption form with the PCF to qualify for the exemption status. Failure to pay the required fees or complete the exemption form in a timely manner will result in a referral to the Department of Regulation and Licensing and possible disciplinary action by the Medical Examining Board.

In the past several years, the Medical Examining Board has received numerous referrals of physicians and osteopaths that qualify for the exemption status but have not completed the necessary paperwork. The board makes every effort to contact these licensees and assist them in obtaining compliance with the Fund's requirements. However, when this cannot be accomplished because of the licensee's relocation or the licensee's failure to respond to contacts, disciplinary action against the licensee is taken. The discipline is reported to other states in which the licensee has a professional license, and can result in additional action by those states.

The Board wishes to highlight the importance of responding to correspondence from the Patients Compensation Fund in a timely manner. For further information regarding the requirements of the Patients Compensation Fund, refer to the website at <http://oci.wi.gov/pcf.htm>

Board Statement Regarding FSMB Pain Treatment Policy

After the FSMB revised its model guidelines in the spring of 2004 to include the under-treatment of pain, the Medical Examining Board restated its earlier position that the FSMB model guidelines are within the standard of care.

Blue License Change – Memorandum from the Credentialing Division

On April 1st, changes were made to the traditional blue licenses. Now the actual license occupies the bottom third of a full-size sheet of paper. It will have horizontal and vertical perforations so that it can be removed from the rest of the sheet. While the sizing is a bit different for the larger part of the license, it retains a similar shape, and the wallet card is identical to the old card.

The advantages to the new form are:

- DRL can use regular laser printers and won't need to maintain its obsolete continuous-feed printer.
- There are several security features in the actual license, including a watermark on the back and some invisible fibers.
- DRL now has the ability to print one mailing address at the top of the form and a physical address on the actual license which will accommodate those situations where establishments can't get mail at the physical location.
- Finally, the new license allows for more efficient processing at the Department of Administration.

For questions or comments on the new license, contact Cathy Pond, Administrator, Division of Credentialing, at (608) 266-0557.

Department Unveils New Website

The Department website has been redesigned to provide you with more convenient access to a wide range of electronic services. The new site offers current and historical information that is

important to you, other professionals, and consumers.

All professions will be listed on the home page and "Quick Links" will provide you with direct access to information specific to your needs. The new website offers access to license application forms, statutes, and administrative codes.

New and enhanced electronic services include online license renewals for most professions, an online address change service for licensees, and access to application status for license candidates. Consumers can find online reports of disciplinary actions and information about the consumer complaint process.

In the future, many publications will be posted on the website rather than mailed.

Digests Available Online

Did you know Regulatory Digests are available on the WEB? To view the electronic version, please go to our website, <http://drl.wi.gov>, and click on "Publications", and then click on "Regulatory Digests."

Available at this Web location are the current Regulatory Digests from all of the Boards. In addition, the Regulatory Digests from the past 6 years are listed here.

Important Information About Physical Therapists and Physical Therapist Assistants - 2001 Wisconsin Act 70

2001 Wisconsin Act 70 made substantive changes to the Physical Therapy Practice Act (2001 Wisconsin Act 70), the most important of which requires physical therapist assistants to be licensed. To view 2001 Wisconsin Act 70 in its entirety, visit the Department's website at <http://drl.wi.gov>

Important Information About Licensed Perfusionists – 2001 Act 89

2001 Act 89 created a license for perfusionists, established the Perfusionists Examining Council, set the license renewal date and application fee, and authorized the Medical Examining Board to write rules implementing the provisions of the Act. It was effective on May 3, 2002. The rules

were effective on April 1, 2004. To view 2001 Act 89 in its entirety, visit the Department's website at <http://drl.wi.gov>.

Disciplinary Actions and Rehabilitation

The purpose of discipline is to protect the public, deter others from similar misconduct and promote rehabilitation. Through experience the Wisconsin Medical Examining Board has concluded that disciplinary actions should be tailored to fit the violation, with the principal concern being how best to protect the public. There are many instances where the nature of a violation warrants a suspension or revocation in order to deter others and safeguard the public.

In some cases public protection is best served by requiring supervision, monitoring, additional education, or by limiting practice.

Disciplinary Actions

The disciplinary summaries are taken from orders that can be reviewed on the Department of Regulation and Licensing Web site: <http://drl.wi.gov>. Click on "Discipline/Orders" and navigate the site by profession to view the actual orders. Decisions reported below may have an appeal pending and the discipline may be stayed. The current status of the discipline may be viewed on the Department's Web Site under "License Lookup," by calling (608) 266-2112 or by checking the progress of cases in court at: www.courts.state.wi.us.
